

State Licensing for Drugs and Devices

Comply with the wide array of state regulations for pharmaceutical product distribution and manufacturing

Who is it for?

Pharmaceutical, biotechnology, medical device organizations and their partners that require state licenses to sell and distribute products throughout the U.S.

Parties include:

- Manufacturers (Contract, Virtual, Foreign, Sampling)
- Wholesalers and Distributors
- Contract Sales Organizations
- Brokers
- Third Party Logistic Providers
- Importers and Exporters
- Researchers and Laboratories
- Nonresident and Mail Order Pharmacies
- Services to obtain, complete and submit state licensing forms for required states (each state has its own forms and requirements depending on your business model)
- Maintain client database and update state registrations on an ongoing basis (each state has different requirements and schedules for renewal)
- Report key changes at your company or in your product line to the appropriate states (each state has different change notification requirements)

Expertise:

- Federal and State registration and licensing requirements and application processing for drug products and devices
- Management of periodic registration updates for each state
- Successful working relationships with all state licensing agencies

The Beckloff Associates advantage

Beckloff Associates has the experience and expertise to assist your company with every aspect of your state licensing program. We will work closely with you during each phase of the process to ensure that your new applications, renewals and change notifications are complete, accurate and meet all state requirements.

About Beckloff Associates

Beckloff Associates is a specialized pharmaceutical research and development consulting group. For more than 30 years, we have provided a wide range of consulting services required to obtain marketing approval for drugs, biologics and medical devices for the U.S. Canadian and European markets. With our unique scientific and strategic regulatory focus, we help biotechnology, pharmaceutical and medical device customers increase the financial return on their research investments through the design and implementation of scientific and regulatory strategies.

Why Beckloff Associates?

Through our commitment to quality and efficiency, we have forged successful relationships with regulatory agencies worldwide.

- The leveraged resources of Cardinal Health
- Diverse drug development network
- Knowledge and information resource
- Emphasis on continued relationships
- Successful relationships with regulatory agencies worldwide
- Sensitive to communication and cultural differences
