Cardinal Health™ Surgical Saw Blades

Better pricing:
25 percent lower†

We deliver high-quality industry standard surgical saw blades at 25 percent lower than the average market price of the leading manufacturer’s products.

Comparable design: meets customer requirements

There is no functional difference between the leading manufacturer’s surgical saw blades and Cardinal Health™ Surgical Saw Blades.∗
- German made with precision to produce consistent and reliable cuts
- High-quality, surgical grade stainless steel
- Sagittal saw blades maintain consistent thickness throughout the body of the blade, helping to reduce the risk of skiving

Performs as you expect:
no change in clinical practice or technique

Cardinal Health™ Surgical Saw Blades provide you with the performance you expect. You won’t have to change clinical practices or technique.

Cardinal Health™ Surgical Saw Blades are compatible with the following power systems:
