Delivering people and process workflow optimization through lean strategies, change enablement and advanced technology readiness.

Our focus as a team is to take you to the next level of supply chain optimization so you can further align your supply chain and clinical teams and be better prepared to:

**Optimization Services**

**Lowering the cost of better care**

Delivering people and process workflow optimization through lean strategies, change enablement and advanced technology readiness.

Our focus as a team is to take you to the next level of supply chain optimization so you can further align your supply chain and clinical teams and be better prepared to:

- Eliminate waste
- Lower costs
- Improve efficiency
- Develop better performance metrics
- Provide better staff and patient experience

Cardinal Health
Essential to care™
We support you through the transformation journey

The first step to controlling your inventory and logistics is knowing which questions to ask. From there, our team of experts can move you from stage to stage through your journey.

As you progress from ideation to execution, consider the following:

Awareness
What are the root causes of current state?

Knowledge
What is the roadmap to the future state?

Enablement
Do we have the bandwidth and skillset?

Reinforcement
Can we sustain this and hold people accountable?

Our customer support model will lead you through each phase for a seamless execution.
