

Helping protect against exposure to infectious diseases

Presource® Products and Services Personal Protection Equipment (PPE) kits

To help limit direct contact with blood, body fluids and airborne contaminants, while helping to ensure your facility is compliant with OSHA workplace health and safety regulations, we offer custom and standard PPE kits. Consult the Centers for Disease Control and Prevention (CDC) recommendations to select the correct kit for your clinical interaction.

We offer standard and expanded kits:

Standard *precaution components in kits*
Including gloves, gowns, masks and goggles or face shield

Expanded *precaution components to address contact precautions*
Including droplet precautions and airborne infection isolation
