

Prepare an electronic document that complies with DSCSA

The following document highlights examples of the transaction data (transaction information, history and statement) that must be present to be in compliance with the Drug Supply Chain Security Act and must be passed electronically beginning November 27, 2017. Cardinal Health requires the use of ASN (EDI 856 files) to transmit the data. In the case where the use of an ASN is not possible (includes any exceptions processing), this information must be made available on a web portal or sent via e-mail. If you have any questions, please contact us at drugtracing@cardinalhealth.com.
