FULLY AUTOMATED RPR *For Syphilis Serology*

The AIX1000 is an FDA cleared, fully automated system for nontreponemal, rapid plasma reagin (RPR) testing. Simply load reagents, up to 192 samples, and walk away. The AIX1000 automates the processing, analysis, result interpretation and archiving for RPR screens and semi-quantitative titers.

Objective Results

Reduced Labor Overhead

FDA Cleared

FULLY AUTOMATED RPR *For Syphilis Serology*

Cost Effective & Efficient.

Reduce the amount of labor overhead dedicated to RPR testing, freeing personnel to increase productivity across laboratory operations.

Fully Automated.

The RPR test procedure and results interpretation are fully automated. Reduce variation associated with manual testing & interpretation.

Performs Screens & Titters.

Run flexible batch sizes of up to 192 samples in 90 minutes. The AIX1000 automates RPR screens and titters, eliminating the need for manual pipetting.

Easy Access to Results.

Images of each RPR test result are stored digitally and are retrievable on demand for review anytime.
