

Put the freeze on global warming

The environment is changing and so are we. Experience the same freezing performance you've come to expect from Cardinal Health™ Freeze Spray while now being better for the earth.

Impact to the environment

- Global Warming Potential (GWP)—measure of a gas's ability to absorb/re-emit infrared radiation over time*
- Larger the bubble (*Figure 1*) the greater the negative impact to the environment
- Today's formulation has a smaller Global Warming Potential footprint than the previous freeze spray formulation

A small act with global impact

Global Warming Potential (GWP)
