SMART COMPRESSION™ DETECTS

Kendall SCD™ 700 SMART COMPRESSION™

It’s compression that’s observant. That notifies you when a sleeve is removed. That shows true therapy delivery time, not just run time. Because when pumps monitor patients 24/7, you won’t have to. That’s smart compliance, and it’s only available in the Kendall SCD™ 700 Compression System.
THE PROBLEM WITH CONVENTIONAL COMPLIANCE

Every hour counts
Relying on current pump timers may not be sufficient. A 2017 study found that 80% of patients had IPCs that were not being used,¹ despite the fact that CHEST guidelines recommend 18 hours of IPC therapy a day.

Patients may remove their sleeves
Patients require frequent checks to ensure sleeves are worn. Hospitals are challenged by technological limitations to ensure compliance and resort to time-consuming manual checks.²

Missed therapy leads to increased patient risk
A study showed that when compliance rose from 11.8 to 20 hours of therapy a day, DVT rates dropped by 63 percent.³

THE SMART COMPRESSION™ DIFFERENCE

The Kendall SCD™ 700 Compression System takes the guesswork out of compression therapy. With it, patients get better care, and you get better peace of mind knowing therapy will be delivered.⁴

A COMPLIANCE METER THAT WORKS WITH YOU

- It allows you to see the patient’s true wear time by nursing shift
- It features Patient Sensing™ Technology, which alerts the nurse if removed sleeves
- It provides a measurement tool to support true compliance to therapy and QIP initiatives
