

Keeping it simple

Discover how an optimized supply chain can help you focus on what matters most

Imagine a supply chain so clean and efficient, it eliminates all the clutter of traditional supply chains. Flexible, data-driven ordering — based on logical units-of-measure — creates a streamlined efficient process that saves on inventory, labor and storage space, while simultaneously increasing fill rates and satisfaction.

Streamline your supply chain and drive efficiencies for patient care. This is the advantage of ValueLink, a supply chain optimization service that can help your organization deliver high quality care at a more affordable cost — keeping your supply chain clean by trimming steps and cutting clutter.

Simplified supply chain

Driven by data, enabled by Valuelink®

ValueLink® Reporting Suite

Use data and analytics to optimize your inventory, labor and storage space.

- ValueLink® Scorecard benchmarks the current program and identifies opportunities
- PAR Health Report prioritizes areas of improvement to optimize PAR management
- Base to ValueLink® Report identifies opportunities to move products to ValueLink®

Proven results for your patients, your staff and your bottom line

Partner with Cardinal Health and invest in ValueLink® supply chain optimization to increase fill rates, access real-time data analytics and enhance staff satisfaction.

Our expert team will help you minimize disruptions, boost efficiency and, above all, save on inventory, labor and storage space:

99%
fill rate

Our adjusted fill rate ensures that you have the products you need when you need them.

Access
data and analytics

ValueLink® provides you with access to data for actionable insights into your supply chain.

Gain
staff satisfaction

Delivering supplies to their points of use lets clinicians spend less time managing supplies and more time with patients.

30-60%
lower inventory costs

Set more efficient inventory levels and logical unit of measure reorder points through PAR optimization, resulting in a one-time inventory reduction.

25-30%
lower labor costs

ValueLink® eliminates needless touchpoints, freeing up your employees to be more productive elsewhere.

Save
storage space

By reducing inventory, you'll free up space for more productive, profitable use.

The peace of mind only ValueLink® can deliver:

- Transparent pricing: No surprises hidden in your line fees
- An optimized supply chain from end-to-end: Pair with additional, innovative services like Cardinal Health WaveMark Inventory Management
- Flexible service: Add fee-based services to customize your program
- Be ready to address pandemic inventory needs: Add on pandemic supply storage solutions
